

FastAccounts

User Guide — Client Books and Payroll for Accounting Bureaus

Invoices, banking, ledger, VAT and Estonian payroll in one bureau workspace.

Worked example: Põhjatäht Teenused OÜ, Northstar Studio Ltd and Demo OÜ (sample payroll)

v0.3.0 · 9 October 2026 · Local demonstration edition

Contents

Section	Pages / slides	What you will do
01 · Get started	3–8	Sign in, read the bureau overview, switch between client books
02 · Sales, purchases and automation	9–15	Invoices, bills, contacts, recurring invoices and reminders
03 · Banking, accounting and tax	16–19	Reconcile the bank, read reports, prepare Estonian KMD workpapers
04 · Payroll for accounting bureaus	20–29	Part-time, hourly and board pay, social tax minimum, pay runs, payslips
05 · Integrations and HR import	30–37	Connect FastHR or import a CSV, and review employees before payroll changes
06 · Reference	38–40	2026 Estonian rates, exemptions, languages and limits

Screenshots come from a local instance seeded with synthetic demo books. Names, personal codes, IBANs and e-mail addresses are test data, not real people or companies. The FastHR import uses a mocked FastHR API.

SECTION 01

Get started

One workspace for every client: switch books from the sidebar, keep each client's ledger separate, and work in English or Estonian.

The public site

fastaccounts.org introduces the product for UK and Estonian books.

- **Get started** and **Sign in** lead to the workspace.
- **Integrations** lists every connector with its real status.
- **Pricing**, **Why FastAccounts**, **For accounting bureaus** and **Roadmap** explain the offer.
- Switch the language with the language button (GB / EE) in the top bar; the choice is remembered.

The version link in the footer opens `/healthz`, which shows the running release and database status.

Sign in

1. Open **Sign in** and choose **Continue with Google**.
2. Use the Google account your bureau has approved.
3. The workspace opens on the **Overview**.

Open self-registration is intentionally disabled. The local demonstration shown here has no Google credentials configured, so the button reports that; production uses Google sign-in.

Bureau overview

Overview summarises the selected client's books:

- **Receivables** and **Payables** — open customer invoices and approved bills.
- **Bank review** — bank lines still waiting for a match.
- **Payroll this month** — employer cost of draft and approved pay runs.

Client books lists every organisation you can access, with receivables per client. The chart compares invoiced revenue with net bank movement for the last six months.

New invoice starts a sales invoice straight away.

Switch between clients

Each client is a separate organisation with its own chart of accounts, documents, bank accounts, payroll and integrations.

1. Click the organisation card at the top of the sidebar.
2. Pick a client; the country badge (EE / UK) shows its rule set.
3. **Create organisation** adds a new client's books.

Payroll is enabled only for Estonian organisations with EUR books; for other clients the **Payroll** menu item is greyed out with an explanation.

Workspace language and version

- **English / Eesti** in the top bar switches every label, message and error. Your choice is kept for the next visit. Estonian payslips are always in Estonian.
- The version chip under the logo (**v0.3.0 · 2026-10-09**) shows the release you are using; click it to open the health check.
- **Public site** and **Sign out** are at the bottom of the sidebar.

On narrow screens the sidebar folds into the ☰ menu.

SECTION 02

Sales, purchases and automation

Issue invoices, review supplier bills and let recurring invoices and the reminder ladder do the routine work.

Sales invoices

Invoices shows every sales invoice with its status: **Draft**, **Issued**, **Part paid**, **Paid** or **Overdue**. Filter with the tabs above the list.

- **PDF** downloads the invoice; **XML** downloads it as structured XML.
- Open a draft to edit, issue or delete it. Issued invoices are immutable and are posted to the ledger.
- **New contact** adds a customer without leaving the page.

Create an invoice

1. Click **New invoice**.
2. Choose the **Customer**, **Issue date** and **Due date**.
3. Enter the **Description**, **Quantity** and **Unit price**.
4. Pick the **Income account** and **Tax code** (for example EE24 – 24%).
5. **Create draft**, review it, then **Issue**.

VAT is calculated per line with exact decimals and posted to the client's VAT accounts when the invoice is issued.

Supplier bills

Bills holds supplier documents before they reach the ledger.

- Statuses run **In review** → **Approved** → **Part paid** → **Paid**.
- **Approve** posts the bill; nothing is posted while it is in review.
- **New bill** and **New supplier** add documents and counterparties.

Use the review step for anything an accountant must check first, such as reverse-charge or non-deductible VAT.

The screenshot displays the 'Bills' section of the FastAccounts application. The interface includes a sidebar with navigation options like Overview, Invoices, Bills, Contacts, and more. The main area shows a table of bills with the following data:

Supplier no.	Supplier	Date	Status	Total	Actions
SUP-2026-008	Jõe Trükikoda OÜ	02/10/2026	In Review	€713.00	<button>Approve</button>
SUP-2026-007	Kuuse Kontor OÜ	01/10/2026	Approved	€632.40	
SUP-2026-006	Männi Pilveteenused OÜ	02/09/2026	Approved	€551.80	
SUP-2026-005	Saare Kirjastus OÜ	01/09/2026	Part Paid	€414.20	
SUP-2026-004	Mae Majutus OÜ	02/08/2026	Part Paid	€355.95	
SUP-2026-003	Jõe Trükikoda OÜ	01/08/2026	Paid	€310.00	
SUP-2026-002	Kuuse Kontor OÜ	02/07/2026	Paid	€229.40	
SUP-2026-001	Männi Pilveteenused OÜ	01/07/2026	Paid	€148.80	

Contacts

Contacts keeps customers and suppliers per client, with type, e-mail, country and VAT number. Filter by **customer**, **supplier** or **both**.

Contacts are reused by invoices, bills, bank matching and recurring schedules, so keep e-mail addresses current: payment reminders go there.

Recurring invoices and reminders

Recurring & reminders lists invoice schedules and the reminder ladder.

- A schedule copies a template invoice **weekly, monthly, quarterly** or every n days. **Run now** is enabled once the next run date is due; **Pause** and **History** manage the schedule.
- **Reminders due** lists overdue invoices at each step: 3 days before due, 7 days overdue and 14 days overdue. **Send reminder** or **Skip** each one.

E-mail delivery needs `POSTMARK_API_TOKEN` and `FROM_EMAIL` ; until then the page says so and nothing is sent.

New schedule

Customer	Name	Interval	Next run	End date	Auto-email	Status	Actions
Willow Design Ltd	Retainer - Willow Design	Monthly	16/10/2026	—	—	Active	Pause Run now History

Reminders due

Email delivery is not connected. Set POSTMARK_API_TOKEN and FROM_EMAIL to send reminders.

Number	Customer	Due date	Stage	Status	Skip
INV-000010	Harbour Training Ltd	15/08/2026	3 days before due	Send reminder	Skip
INV-000010	Harbour Training Ltd	15/08/2026	7 days overdue	Send reminder	Skip
INV-000010	Harbour Training Ltd	15/08/2026	14 days overdue	Send reminder	Skip
INV-000011	Brightline Media Ltd	16/08/2026	3 days before due	Send reminder	Skip
INV-000011	Brightline Media Ltd	16/08/2026	7 days overdue	Send reminder	Skip
INV-000011	Brightline Media Ltd	16/08/2026	14 days overdue	Send reminder	Skip
INV-000012	Willow Design Ltd	17/08/2026	3 days before due	Send reminder	Skip
INV-000012	Willow Design Ltd	17/08/2026	7 days overdue	Send reminder	Skip
INV-000012	Willow Design Ltd	17/08/2026	14 days overdue	Send reminder	Skip

Create a recurring schedule

1. Create and save a draft invoice to use as the **Template invoice**.
2. Click **New schedule** and give it a **Name**.
3. Choose the **Interval**, the **Next run** date and an optional **End date**.
4. Tick **Auto-email** to send each new invoice automatically.
5. **Create schedule**.

Each run creates a normal invoice from the template, so numbering, VAT and posting follow the same rules as invoices you create by hand.

SECTION 03

Banking, accounting and tax

Match bank lines to documents, read the ledger and prepare VAT workpapers for accountant review.

Banking and reconciliation

Banking shows each bank account and its imported transactions.

1. **Import statement** (CSV or CAMT.053 XML).
2. Each unmatched line offers explainable match suggestions; click **Review**.
3. **Confirm match** to allocate the payment to invoices or bills.

Add account registers another bank account for the client. Confirmed matches post the payment and update invoice and bill statuses.

Estonian VAT (KMD) workpapers

Tax prepares the Estonian **KMD** (and the UK nine-box VAT return for UK books).

1. **Prepare workpaper** for the period.
2. Check the boxes against the listed tax codes.
3. **Mark accountant reviewed** before exporting.

Prepare VD builds the EU sales listing. Exports require accountant review; FastAccounts does not file directly with EMTA or HMRC.

The screenshot displays the FastAccounts web application interface. The top navigation bar includes the FastAccounts logo, version information (v0.3.0 - 2026-10-09), the current workspace (Põhjataht Teenused OÜ), and language options (English, Eesti). The left sidebar contains a menu with categories: BUREAU / HOME (Overview), DOCUMENTS (Invoices, Bills, Contacts), AUTOMATION (Recurring & reminders), MONEY (Banking), ACCOUNTING (Accounting), and PAYROLL (Payroll). The 'Tax' option is highlighted. The main content area is titled 'Estonian KMD' and includes a sub-header 'Prepare, review, then export your workpaper.' Below this, a message states 'Exports require accountant review. No direct filing takes place.' A table titled 'Tax codes' lists various codes and their corresponding rates. The table has three columns: Code, Description, and Rate. The data rows are as follows:

Code	Description	Rate
EE0	Nulimääraga käive	0%
EE13	Vahendatud määr 13%	13%
EE24	Standardmäär 24%	24%
EE9	Vahendatud määr 9%	9%
EEEX	Maksuvaba käive	0%
EEICS	Ühendusesisene käive	0%
EEOS	Kaibemaksu kohaldamisalast väljas	0%
EERC	Pöördmaksustamine	24%

SECTION 04

Payroll for accounting bureaus

Estonian 2026 payroll per client: monthly, part-time, hourly and board-member pay, the social tax minimum, payslips and automatic ledger postings.

Employees

Open **Payroll** in an Estonian EUR client (here **Demo OÜ (sample payroll)**).

- **Gross salary** shows monthly pay, or the **hourly rate per hour**.
- Part-time staff show their fraction (**Part-time 0.5**); board members carry a **Board member** badge.
- **Pension %** is the II pillar rate (0, 2, 4 or 6%).
- **Tax-free minimum** shows who applies the €700 basic exemption here.

Add employee and **Run payroll for month** are at the top right.

Pay runs

Period	Status	Gross	Net	Employer cost	Actions
2026-10	Draft	€16,254.00	€12,480.00	€21,797.23	Delete draft Approve & post

Employee breakdown (7)

Employee	Gross	Income tax	Pension	Net	Social tax	Employer cost	Actions
----------	-------	------------	---------	-----	------------	---------------	---------

Part-time employee

1. **Pay basis: Monthly salary.**
2. **Monthly salary or board fee:** the contractual monthly gross (€700).
3. **Work-time fraction (FTE):** 0.5 for half time.
4. **Pension %:** 0% is allowed for anyone not in the II pillar.

The minimum-wage check is pro-rated: $€946 \times 0.5 = €473$ from 1 April 2026 (€886 before). Set **Employment start date** and **end date** so pay runs skip people outside their employment.

The screenshot displays the FastAccounts payroll management interface. A modal window titled "Edit employee" is open, allowing for the configuration of an employee's payroll details. The background shows a sidebar with navigation options like Overview, Documents, and Payroll, and a main area with a list of employees and a payroll table.

Edit employee

Name: Email:

Personal ID: Pay basis:

Monthly salary or board fee: Work-time fraction (FTE):

Pension %: Social tax minimum exemption:

Employment start date: Employment end date:

☒ Apply tax-free minimum ☒ Active

Employee breakdown (7)							

Review a draft pay run

The October 2026 draft lists gross, net and employer cost for the client (€16,254.00 gross, €21,797.23 employer cost). **Employee breakdown** shows:

- **Peeter Oja**: €8.00 × 176 hours = €1,408.00 gross.
- **Liis Kuusk** (0.5 FTE, €700): social tax €292.38, including a **Social tax minimum top-up** of €61.38 paid by the employer.
- Income tax, II pillar, net pay and employer cost per person.

Pay runs

Period	Status	Gross	Net	Employer cost	Actions
2026-10	Draft	€16,254.00	€12,480.00	€21,797.23	Delete draft Approve & post

Employee breakdown (7)

Employee	Gross	Income tax	Pension	Net	Social tax	Employer cost	Actions
Andres Mets	€5,500.00	€1,118.04	€330.00	€3,963.96	€1,815.00	€7,359.00	
Jaan Kask	€2,400.00	€508.99	€48.00	€1,804.61	€792.00	€3,211.20	
Kadri Saar	€3,800.00	€789.18	€152.00	€2,798.02	€1,254.00	€5,084.40	
Liis Kuusk Part-time 0.5	€700.00	€0.00	€0.00	€688.80	€292.38 Social tax minimum top-up: €61.38	€997.98	
Mari Tamm	€946.00	€46.63	€18.92	€865.31	€312.18	€1,265.75	
Peeter Oja €8.00 × 176 hours	€1,408.00	€144.61	€28.16	€1,212.70	€464.64	€1,883.90	

Run payroll for a month

1. Click **Run payroll for month** and choose the **Month**.
2. Check the **Included employees** (active and employed in that month).
3. Enter **Hours worked** for each hourly employee.
4. **Create draft** and confirm.

Employee details are frozen in the draft, so later edits do not change it. A failed minimum-wage check names the employee and the amount.

Run payroll for month

Month:

Included employees

Name	Gross salary	Hours worked
Andres Mets	€5,500.00	
Jaan Kask	€2,400.00	
Kadri Saar	€3,800.00	
Liis Kuusk Part-time 0.5	€700.00	
Mari Tamm	€946.00	
Peeter Oja	€8.00 per hour	160
Toomas Rebane	€1,500.00	

Enter hours worked for each hourly employee.

Employee details are frozen when the draft is created. Review before approval.

Approve and post

Approve & post shows the employer cost and asks for confirmation. Approval:

- posts one balanced payroll entry to the client's ledger;
- locks the run (delete or edit only while it is a draft);
- makes the **Payslips PDF** available.

Delete a wrong draft with **Delete draft** and create it again.

The screenshot shows the FastAccounts v0.3.0 interface. On the left is a dark sidebar with navigation links: Overview, Invoices, Bills, Contacts, Recurring & reminders, Banking, Accounting, Tax, and Payroll (highlighted). The main area displays a 'Pay runs' table for period 2026-11, currently in 'Draft' status. A modal dialog titled 'Approve & post' is centered, stating: 'This payroll will be posted to the ledger and cannot be edited. Employer cost: €21,797.23'. The dialog has 'Cancel' and 'Confirm' buttons. In the background, the payroll table shows columns for Period, Status, Gross, Net, Employer cost, and Actions. A detailed breakdown table below shows employee data with columns for Social tax and Employer cost.

Period	Status	Gross	Net	Employer cost	Actions
2026-11	Draft	€16,126.00	€12,383.76	€21,625.97	Delete draft Approve & post

Employee	Gross	Net	Employer cost	Actions
Mari Tamm	€946.00	€46.63	€18.92	€312.18
Peeter Oja	€8.00 per hour	€117.46	€25.60	€422.40
Toomas Rebane	€1,500.00			

Employee	Gross	Net	Employer cost	Actions
Kadri Saar	€3,800.00	€2,798.02	€1,254.00	€5,084.40
Liis Kuusk	€700.00	€0.00	€292.38	€997.98
Part-time 0.5			Social tax minimum top-up: €61.38	
Mari Tamm	€946.00	€46.63	€18.92	€312.18
Peeter Oja	€8.00 x 160 hours	€117.46	€25.60	€422.40

Payslips

Payslips PDF produces one page per employee (Estonian *palgaleht*):

- gross pay, or hourly rate × hours, and the work-time fraction;
- II pillar, employee unemployment insurance, tax-free minimum used, income tax;
- net pay, social tax with its base and any **minimum top-up**, employer unemployment insurance and total employer cost.

Submitting the TSD return to EMTA is not automated; the accountant files it.

PALGALEHT 2026-10

Demo OÜ (sample payroll)
Registrikood: 14999992
Töötaja: Liis Kuusk
Validud periood: 2026-10
Kuupäev: 2026-10-09
Olek: Kinnitatud | EUR
Töötaja
Töökoormus (FTE): 0.5

Brutopalk	700.00
Kogumispension (II samm)	0.00
Töötuskindlustusmakse (töötaja)	11.20
Maksuvaba tulu	688.80
Tulumaks	0.00
Kinnipeetud summad kokku	11.20
Netopalk	688.80
Sotsiaalmaks (tööandja)	292.38
Sotsiaalmaksu arvestamise alus	886.00
Sotsiaalmaksu miinimumkohustuse lisamakse	61.38
Töötuskindlustusmakse (tööandja)	5.60
Tööandja kulu kokku	997.98

TSD deklaratsioon koostatakse raamatupidajale ülevaatamiseks; otse EMTA-le esitamine ootab kasutajapoolset vastuvõtetestimist (UAT).
Maksmise tähtaeg: 10. kuupäev (väljamakse tegemise kuule järgneval kuul).

Payroll in the ledger

Each approved run posts to the client's payroll accounts, for example:

- **6110** salaries, **6120** social tax, **6130** employer unemployment insurance;
- **2210** net pay owed, **2220** income tax withheld, **2230** pension and unemployment insurance, **2240** social tax payable.

The social tax minimum top-up is a separate line with its own description, so it is easy to explain to the client. Postings appear under their period end.

Social tax minimum

Rule	2026
Monthly minimum base	€886 → minimum social tax €292.38 per employee
Who pays the shortfall	Employer, as an extra employer cost
Part-month employment	Base pro-rated by calendar days employed
Board-member fees	Outside the obligation
Exemption recorded per employee	Pensioners, reduced work ability, child care, students, previously unemployed, shortened working time, council members, ship crew, foreign-service spouses, long-term sick leave, absent all month, another employer applies the exemption

Sources: Sotsiaalmaksuseadus § 2 lg 2–4; Rahandusministri määrus nr 17; EMTA “Sotsiaalmaks”. Choose the matching **Social tax minimum exemption** on the employee; it is printed on the payslip.

SECTION 05

Integrations and HR import

Connect each client's HR system once, then review every imported employee before payroll data changes.

Integrations

Integrations (under **Settings**) lists ready connectors first, with:

- **Registry status** — what the adapter supports today;
- **Connection status** — this client's connection.

Employee file import needs no connection; **FastHR**, **QuickBooks Online**, **Xero** and **Merit Aktiva** are ready to connect. Planned integrations are listed below; **Public catalogue** opens the full list on the public site.

The screenshot shows the FastAccounts web application interface. The top navigation bar includes the FastAccounts logo, version information (v0.3.0 - 2026-10-09), the current workspace (Demo OU (sample payroll)), and language options (English, Eesti). The left sidebar contains a navigation menu with sections: BUREAU / HOME (Overview), DOCUMENTS (Invoices, Bills, Contacts), AUTOMATION (Recurring & reminders), MONEY (Banking), ACCOUNTING (Accounting, Tax), PAYROLL (Payroll), and Public site. The main content area is titled 'Integrations' and includes a 'Public catalogue' link. Below the title, it states 'Configure, test and review data for this client.' and 'Ready to connect' with '5 providers'. The integrations are listed in cards: 1. Employee file import: Registry status 'Adapter ready', Connection status 'No connection needed'. It includes a description about importing master records from CSV or TSV and buttons for 'Recent runs' and 'Import file'. 2. FastHR: Registry status 'Adapter ready', Connection status 'Connected'. It includes a description about importing master records and buttons for 'Configure', 'Test connection', 'Disconnect', 'Recent runs', and 'Run employee import'. 3. QuickBooks Online: Registry status 'Adapter ready', Connection status 'Not configured'. It includes a description about coexisting with existing QuickBooks and buttons for 'Configure' and 'Test connection'. 4. Xero: Registry status 'Adapter ready', Connection status 'Not configured'. It includes a description about exchanging accounting data and buttons for 'Configure' and 'Test connection'. 5. Merit Aktiva: Registry status 'Adapter ready', Connection status 'Not configured'. It includes a description about supporting Estonian accountant workflows and buttons for 'Import and export - reviewed'.

Connect FastHR

1. Click **Configure** on the FastHR card.
2. Enter the **Base URL** and the client's **API token**.
3. **Save configuration**, then **Test connection**.

Secrets are encrypted per client and never shown again; enter a new token to replace one. **Disconnect** removes the connection; FastHR is read-only, so nothing is ever written back.

Run an employee import

Run employee import stages FastHR employees for review; nothing changes yet.

- **Matched employee** links a record to an existing employee by e-mail or personal code.
- FastHR's annual base salary becomes the monthly gross ($\div 12$); its work-time ratio becomes the FTE; hourly staff become hourly pay.
- A **Review note** warns when FastHR has no salary or hourly rate.

Review employee import

FastHR - Review staged records before payroll data changes.

Back to integrations

Recent runs

Staged employees

Apply decisions

Source record	Status	Matched employee	Review note	Decision
Eva Näidis eva.naids@demo-ou.example View source record	Pending	No local match	—	☐ Approve ☐ Reject
Kadri Saar kadri.saar@demo-ou.example View source record	Pending	Kadri Saar	—	☐ Approve ☐ Reject
Uku Test uku.test@demo-ou.example View source record	Pending	No local match	FastHR has no salary or hourly rate for this employee; skipped until one is added in FastHR	☐ Approve ☐ Reject
Rein Proov rein.proov@demo-ou.example View source record	Pending	No local match	—	☐ Approve ☐ Reject

Apply decisions

1. Tick **Approve** or **Reject** for each record.
2. **Apply decisions.**

Import outcomes counts applied, updated, unchanged, rejected and failed records and lists the reasons. A record without pay is skipped, not guessed; fix it in FastHR and use **Retry apply**. **Recent runs** keeps the history.

Import an employee file

For clients whose payroll or HR system has no connector, use a file export.

1. On the **Employee file import** card, click **Import file**.
2. Choose a **CSV or TSV file**, or paste its contents.
3. **Stage employees**.

Recognised headers include *Employee ID, Name, Email, Salary (monthly), Personal ID* and *Status*, also in Estonian (*Nimi, E-post, Palk, Isikukood*). Export Excel workbooks as CSV first. The raw file is not stored.

Review a file import

A file import uses the same review as FastHR: each row is staged as **Pending**, matched to existing employees by e-mail or personal ID, and changes nothing until you **Approve** it and **Apply decisions**.

Re-importing the same file is safe: unchanged rows are reported as **Unchanged** instead of creating duplicates. **Recent runs** lists earlier file imports for this client.

Imported employees in payroll

Approved records appear in **Payroll** like any other employee: here **Eva Näidis** (part-time 0.6, €1,200.00 a month from €14,400 a year) and **Rein Proov** (hourly, €7.50).

Before the next pay run, complete what FastHR does not hold: II pillar rate, basic exemption application and any social tax minimum exemption.

SECTION 06

Reference

2026 Estonian payroll rates, what FastAccounts does not do, and where to find help.

Estonian payroll rates 2026

Item	Rate or amount
Income tax	22%
Basic exemption (on written application)	€700 per month
Social tax (employer)	33%, minimum base €886 per month
Unemployment insurance	employee 1.6%, employer 0.8%
Funded pension (II pillar)	0%, 2%, 4% or 6%
Minimum wage until 31.03.2026	€886 per month, €5.31 per hour
Minimum wage from 01.04.2026	€946 per month, €5.67 per hour

Sources: EMTA "Maksumäärad"; Vabariigi Valitsuse määrus nr 36 (23.03.2026). Money is calculated with exact decimals and rounded half-up to cents.

Limits and next steps

- **Filing:** KMD and VD workpapers are prepared for accountant review and exported; nothing is filed with EMTA or HMRC automatically.
- **E-mail:** reminders and auto-e-mailed invoices need Postmark settings.
- **Payroll:** Estonian EUR books and 2026 periods only. Leave, sickness, benefits, non-resident cases, TSD submission and salary payments are outside the calculation; accountant UAT is pending ([docs/payroll_rules.md](#)).
- **Imports:** FastHR imports employee master data, not hours or leave.

Release notes are in [docs/change_log.md](#) ; rebuild this guide with [docs/USER_GUIDE_BUILD.md](#) .
